

Diversi-foam Hybrid Cushion

Dual combination self adjusting cushion

Coccyx cutout

Coccyx air/ foam cell

Ischial air/ foam cell

Rear thigh air/ foam cell

Front thigh air/ foam cell

**ULTIMATE
IMMERSION
THERAPY
SYSTEM**

The **Diversi-foam hybrid cushion** incorporates air and foam filled cells with visco elastic inserts to redistribute pressure away from high risk areas without requiring initial set up or regular intervention.

The cushion adjusts automatically to the users weight distribution and can be used for patients up to a **Very High Risk** of pressure ulcer development, within multiple care settings.

Features & Benefits

Foam inserts

Visco elastic foam allows for immersion, comfort and postural support whilst re-distributing pressure away from high risk areas

Coccyx, Ischial, front and rear thigh air cells

Castellated visco elastic foam within aircells offering continuous seated support and pressure redistribution

Ultimate Immersion therapy

A combination of aircells and an intrusive valve react to provide natural user immersion. The negative pressure created also benefits the user with additional postural support
