

Integral Heel Support

Viscoelastic Foam with Memory Effect

The **Integral heel support** consists of viscoelastic foam with a memory effect which provides pressure reduction for those who are considered to be at a high risk of pressure ulcer development on their heels. The heel support is suited to users with normal or slightly limited mobility. It is also ideal for elderly users or those subject to constant movement of the lower limbs.

Features	Benefits
Viscoelastic foam with memory effect	Viscoelastic foam gives the heel support better resistance against subsidence. The memory foam allows precise moulding of the heel therefore provides better pressure distribution. 
The Form	The Achilles tendon is protected by side supports and the forefoot and heel section are hollowed out to direct pressure towards lower risk regions. 
The Cover	The breathable, waterproof and vapour permeable cover promotes comfort whilst aiding infection control. The heel support is covered with a soft, bi-stretch polyurethane cover and has a comfortable attachment system offering sustainable support and easy installation. 

Technical Specification

UHC Product code	SYST'AM® Product code	Cushion Dimensions
USYC0HEEL	P901T1HW	55 x 25x 7.5cm / 21½ x 10 x 3"

Warranty: 2 years

Cleaning of the cover:     

Cleaning of foam: Do not immerse in water     

UHC product code: USYC0HEEL
SYST'AM® product code: P901T1HW
