

Ultra-Cline

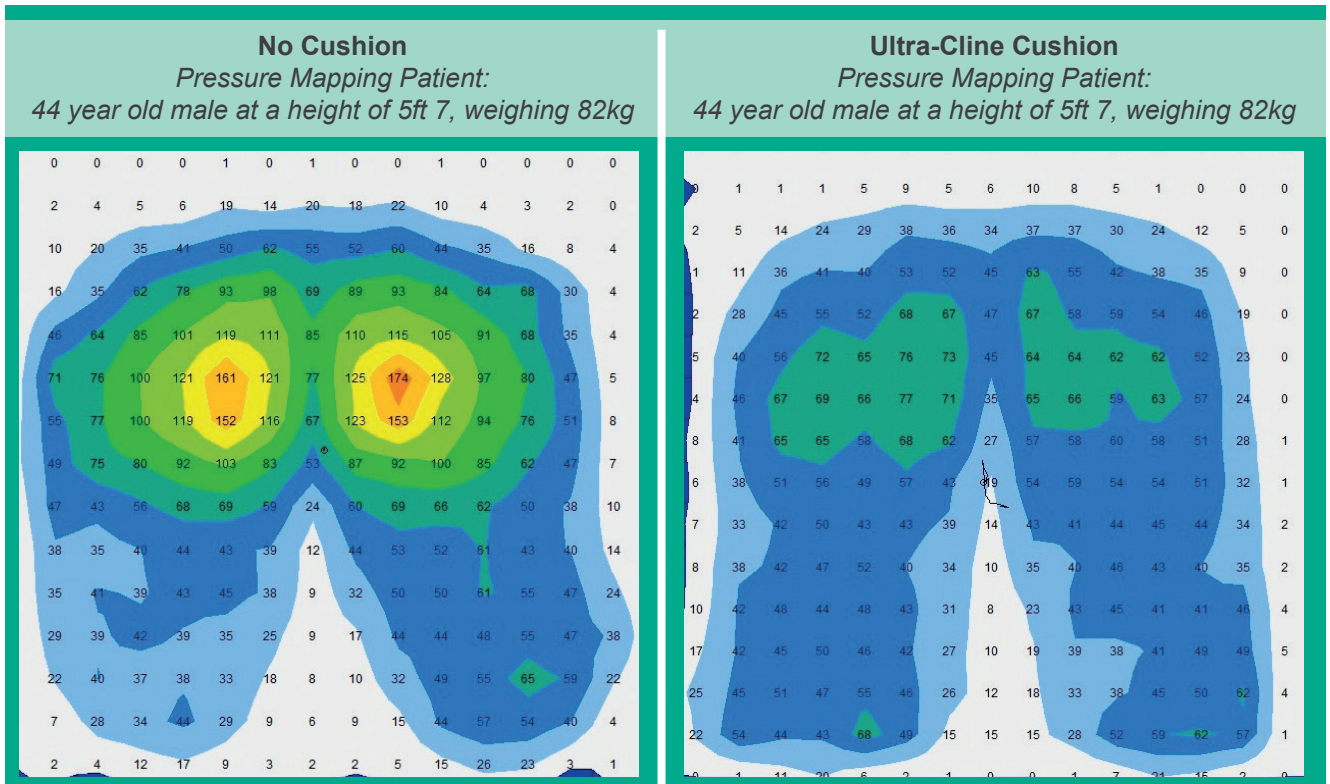

Pressure reducing foam cushions.
Specifically developed for use on rise recliner chairs

The Ultimate Ultra-Cline cushions are cost effective and have been specifically developed to be used on rise recliner chairs. The pressure reducing cushions provide added comfort and postural support to existing chair cushions.

The 2-way stretch, waterproof and vapour permeable cover assists infection control and the visco elastic foam provides comfort.

Cleaning of the system is required regularly and between patient use to prevent cross infection. For thorough decontamination the system should be carefully cleaned with 1000ppm prepared solution of sodium hypochlorite or a similar disinfectant and allowed to dry completely. For daily cleaning, wipe the cover with soap and water.

See instructions of use document for further details on cleaning.
