

Viscoflex® Plus Bariatric

Pressure reducing foam cushion

SYSTEM®

The ViscoFlex® Plus Bariatric Cushion is an anatomical moulded cushion combining visco elastic foam with an ergonomic insert, providing pressure reduction for those who are considered to be up to a very high risk of pressure ulcer development.

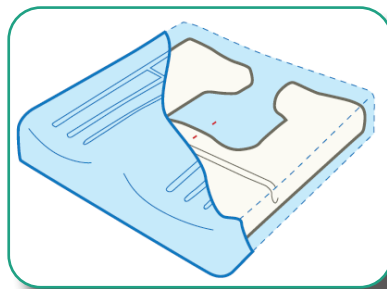

A removable, vapour permeable POLYMAILLE® HD cover is welded to eliminate fluid ingress and aids decontamination.

Features & Benefits

High-density visco elastic foam

Gives better resistance against subsidence and allows for precise moulding of the body to provided pressure re-distribution.

Anatomical design

Raised lateral edges and a front to back slope results in improved positioning, stability and comfort as the contact surface is increased.

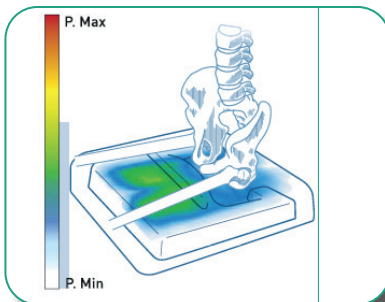

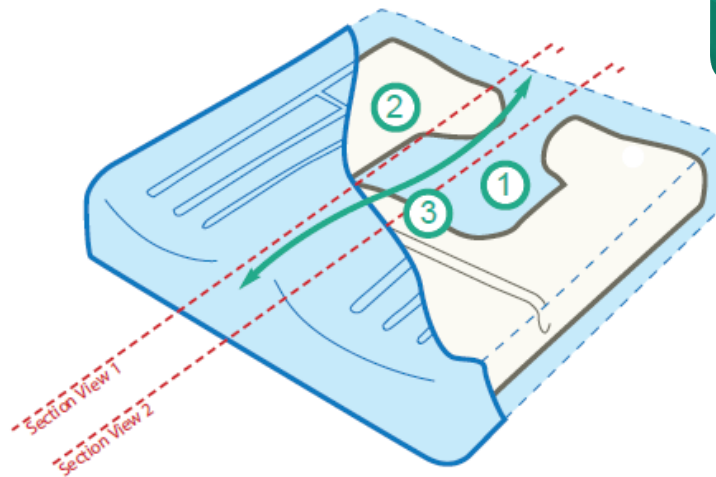

Multi weight bearing Insert

The insert enables a controlled and stabilised immersion. With a different bearing capacity at the front of the cushion, to reduce pressure put on the users ischia
