## **1. Description of product**

This bath step has been designed as a versatile modular adjustable platform bath step. It features four 1" high sections that can be joined together to build up a secure & stable platform.

The step is supplied with four 1" (25mm) sections giving a basic step of 4" (100mm) but can be added to with further sections up to a maximum height of 8" (200mm), subject to your own risk assessment. Each section has four strong locator pins that fit firmly into the section below.

The bottom section has four rubber feet to prevent any slippage of the step-in use. The top area of each section is textured to provide a slip reducing surface, without making it uncomfortable on the feet.

## **2. Instructions for use**

To prevent any overbalancing problems when either stepping into or out of the bath, please ensure that the step height is equal to the height of the lowest point inside the bath. This will allow both feet to be at the same level whether stepping in or out of the bath.

**WARNING:**

- Avoid sudden or undue movement whilst using this equipment.
- Ensure the step is dry, free from liquid, soap, oil film or any slippery substance.
- Before using the bath step, ensure all sections are firmly pushed together.

**CAUTION:**

- Position step against the side of the bath
- Stand centrally on the step with both feet
- Step directly in to the bath

**NOTE:**

- Test for stability before use
- The product is designed for use in a static mode only

### 3. Cleaning Instruction

Use a non-abrasive mild detergent along with warm water & a soft cloth to clean the step. Rinse with clean warm water & a soft dry cloth.

**CAUTION:**

- Do not use any form of abrasive cleaner, cloth or sponge as this could cause damage to the product.

### 4. Technical specification
