

Mesh full length side rail bumpers

Specifically design for the telescopic full length side rails

The **mesh full length side rail bumpers** have been designed to fit neatly onto each full length Cura II, Cura II Supreme and Cura Community side rail.

The top and bottom pads are connected by a strong transparent net which 'concertinas' to save space when the sides are lowered.

An additional bumper extension piece is available for the bed/side rail when extended.

Available in a wipe clean material for infection control.

Features:

- Used to reduce injuries sustained by knocking or striking against the rails.
- Fits securely to the bed frame
- Pair of mesh side rail bumpers
- Easy to wipe clean
- Transparent net
- Enhances patient comfort
